

Dundee College  
Gardyne Campus

**Dundee College  
Gardyne Campus**

This exciting regeneration project will transform the learning environment for staff and students in the future as part of Dundee College reforms. Dundee College is one of Scotland's largest Colleges with over 28000 enrolled students and over 700 staff. The regeneration of the existing Gardyne building will deliver a modern contemporary building with a feature distinctive walk way at high level across the atrium area.

Due to the restrictive ceiling voids and the multiple systems the services required to be fully co-ordinated with the main spine services being prefabricated in our off site workshop.

The boiler plant room was also prefabricated and was delivered for site assembly with the equipment skid mounted providing an efficient solution.

**Project**

Dundee College Gardyne Campus

**Client**

Dundee College

**Management Contractor**

Bovis Lend Lease

**Consulting Engineer**

Hawthorne Boyle

**Value**

£8 Million

**Completion**

April 2011

**Contract Period**

15 Months
